Tunnel	960	Vent
Width:	9.6m	9.6m
Beam Height:	2.4m	2.4m
Top Height:	4.0m	4.5m
Length:	10-100m	10-100m
	(multiples of 2.5m)	

The GreenSpan Tunnel 960 - Your Best Choice!

The most economic way of growing plants, flowers and vegetables for the small and medium sized grower. The straight sides allow easy working and cultivation of climbing plants such as tomato, cucumber or pepper, etc.

A modular system of prefabricated components that is very easy and fast to build even by unskilled people.

The Tunnel 960 is available in a standard width of 9.6 m and in multiples of 2.5m in length - anywhere from 10m up to 100 m.

Strong and Durable

Heavy 60mm steel hoops. All components are galvanized and maintenance free.

Film cover

A wide range of high quality films with very long durability are available.

- Imported from Europe.
- 3 layer co-extruded formulation; high EVA content.
- Maxi diffused film with a cooling effect during the day and thermic effect at night.
- Maxi Solar film with high transparency.
- Maxi Long Life film with high sulfur resistance.

Fixation of the film

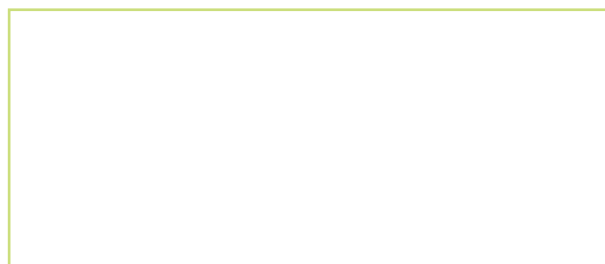

Fixed with special Aluminium profiles with spring steel insert that is re-usable, easy and fast to handle. No plastic parts used.

Foundation

Galvanised prefab steel elements in concrete.

Optional Features

- The straight sides can be covered permanently with film, fully open or with a roll-up system which may be manual or motorized.
- To make the sides insect proof an additional screen of Polyam insect netting can be fitted.
- A system of 24 volt motors and a mini computer can automate the opening and closing of the sides.
- For extra ventilation an open top roof ventilation system can be fitted on the top. This again can be provided with Polyam insect netting (available in 3 different types).
